

# The Second Problem in The Herald's Diamond Puzzle Contest

Extra Charts of This Puzzle Will Be Mailed to Those Entitled to Them Tomorrow Morning

## Correct Solution of Problem No. 1.

### 1279 Diamonds

All those who submitted 1,279 as the correct solution of the first problem are entitled to submit one solution of the tie-breaking puzzle presented herewith. Four extra copies will be mailed to each tied contestant which are all that will be available.

As there were more people tied than there are prizes only those who submitted 1,279 are eligible to solve the second problem.

Solutions of the second problem must be registered at The Herald office by 6 o'clock Wednesday evening, May 17, or mailed so as to bear a postmark not later than that time, except in the case of those residing at a distance, to whom an extension will be allowed corresponding to the greater length of time it requires them to receive their charts than it does those residing in Washington. Contestants residing at a distance will be governed accordingly.

Those who did not pay the full amount allowed to be paid with each solution when submitting solutions of the first problem may increase the amount to the limit when they send their solutions of this if they wish to take advantage of the dividend the larger payment may entitle them to in case they win any of the dividend prizes.

## Second Problem Rules and Conditions.

Draw a continuous connected chain of circles across the face of the chart beginning at any point in the left-hand margin, and ending in the right-hand margin, so that the total of the figures will be the greatest. The chain must run a parallel with the intersecting lines, as shown in the chart, and may be drawn in any direction, but the total number of circles in the entire chain must not exceed 430.

There must be either three, four or five circles in each section of the chain, but those containing five must not exceed the number containing either three or four.

By section is meant a series of three, four or five circles in a straight line. The circle at the angle where the chain turns is to be regarded as the end of one section and the beginning of the next. In totalling the figures, however, the numbers in such circles are to be counted but once, of course.

No section of the chain shall run

closer to any other parallel section than one row of figures. That is, there must be one row of figures between any two parallel sections the same as between sections two and three in the illustrative chart.

The circles can be drawn with either pencil or ink, but contestants should use care to draw them so they will not obliterate the numbers. A mistake in stating the number of points will disqualify the chart.

In case of a tie on the number of points the Contestant having the least number of circles in the chain will be regarded as having the best solution.

When submitting your solution write your name and address on a slip of paper and attach it securely to the chart. Also state the amount you paid with your solution of the first problem and how much more you send now if you wish to take advantage of the foregoing offer. This, of course, is applicable only to those who did not pay the limit in the preceding contest. Hold your working papers subject to call, should the puzzle manager desire to examine them. Address

## This Illustrates How to Work It

The first section in the adjoining chart contains three circles and begins at 83 in the left hand margin. The second section contains three circles; the third five, and so on. The last section contains four circles and ends at 30 in the right hand margin.

The total number of points is 4022.

It is permissible to draw the chain either towards the right or left as shown in the adjoining chart.

the Valle Crucis School in reference to the chapter's program. Laura Moody, included with Miss Horner's letter was a most interesting essay, prepared by Laura Moody, on "The Present War Situation." A committee was appointed to look after the chapter's "milestones." ## WHITE SULPHUR SPRINGS.

The meeting of the Trans-Allegheny Good Roads Association, of which Mr. George W. Stevens is president, was held at the Greenbrier on Saturday morning and over 100 delegates from all parts of West Virginia and a few from Virginia, were present. The meeting was of interest to every one interested in the development of motor-touring and good hard roads through territories in Virginia and West Virginia where they have been notoriously bad. The great Midway Trail, running from the Ohio River through White Sulphur, connects with the James River Trail at Allegheny, Va., and

each county has raised its money for perfecting the roads by bond issues so that motor-touring through the Alleghenies promises to become one of the most delightful sports of the summer season.

Mr. A. A. Paton, of Washington, gave a dinner at the Colonial Club on Tuesday evening in compliment to Sir Richard and Lady Crawford and their guests were entertained in the colonial room which was decorated with spring flowers. Lady Ross gave a dinner there also on Wednesday evening for Sir Richard and Lady Crawford, Mrs. Paton and her sister, Mrs. Ellison Adams, with whom she left for Washington last Thursday.

The Washington colony at White Sulphur during the coming summer promises to be a notable one and many applications for cottages are coming in. Indications point to a very early season, as most of the cottages will be occupied in June. Plans for the great mid-summer horse show at "The Meadows" on August 11 and 12 are already being perfected.

Of interest to Washington society is the announcement of the arrival at the Greenbrier of Mr. and Mrs. Orton White, of Berlin, N. H., for a stay of some length at the Greenbrier, who was the daughter of the late Gen. John R. Gordon resided in Washington at the time of her marriage to Mr. Brown, a young New Hampshire millionaire.

Mrs. and Mr. Brown will probably stop at the Greenbrier on their way to the north. They have one of their five children with them.

## Miss McNeal Departs.

Miss Katherine McNeal has returned to New York after a short visit in Washington, where she appeared in concert on several occasions with distinct success. Her piano recital at the Congressional Club, in particular, attracted one of the largest and most distinguished assemblies of the season. Of rare personal charm, Miss McNeal gave a brilliant performance enveloped with the true lyric touch and a phrasing as flawless as her technique.

Her program was one of wide range from the difficult and intricate Bourée in B minor of Bach-Saint-Saëns to a Spanish dance by Granados.

In three of the numbers, Chopin's "Scherzo," "La Campanella" by Paganini-Liszt, and Rubinstein's "Barcarole," Miss McNeal showed complete mastery of her art.

As an encore she rendered with an insinuating and wistfulness the famous melody of Gluck-Schubert. Miss McNeal came to the city of her birth after a long absence abroad where she studied under famous masters, and will soon be ready to take her place on the concert stage where she belongs. After the recital Miss Margarita Spaulding, the well-known author, read with eloquence and appeal, selections from her own writings.

George Nicholson announces the marriage of his son, Wallace W. Nicholson, to Miss Mary E. Fischer, formerly of Baltimore, at the parsonage of Rev. L. J. Zimmerman, of Baltimore, December 12, 1916.
